

# Zscaler Cyber Academy

## Zero Trust Cyber Associate (ZTCA)

DATASHEET

### About the Course

The Zscaler Zero Trust Cyber Associate (ZTCA), one of the industry's most comprehensive zero trust credentials, helps network and security professionals attest their expertise in establishing a holistic, layered security approach based on zero trust principles. The ZTCA certificate course offers practical guidance on how to deliver effective control and visibility across zero trust initiatives, as well as contrasting zero trust approaches with legacy architectures. Finally, it explores architectural constructs for real-world implementation, including in the context of the Zscaler Zero Trust Exchange™.
