

# Zscaler Internet Access™

Deliver fast, secure access to the internet and SaaS apps with a complete security stack as a service.

Zscaler Internet Access delivers your security stack as a service from the cloud, eliminating the cost and complexity of traditional secure web gateway approaches. By moving security to a globally distributed cloud, Zscaler™ brings the internet gateway closer to the user for a faster experience. Organizations can easily scale protection to all offices or users, regardless of location, and minimize network and appliance infrastructure.

Because Zscaler sits in between your users and the internet, it inspects every byte of traffic inline across multiple security techniques, even within SSL. You get full protection from web and internet threats. And with a cloud platform that supports Cloud Firewall, Cloud IPS, Cloud Sandbox, Cloud DLP, CASB, and Cloud Browser Isolation, you can start with the services you need today and turn on others as your needs grow.

## Editions and Enterprise License Agreement

Zscaler services are conveniently packaged in editions on an annual, per-user subscription basis. By moving your security costs from CAPEX to OPEX, Zscaler simplifies your budgeting and operational processes. For larger customers, the Enterprise License Agreement provides the most robust and flexible cost approach to network and security transformation.

<p><b>Professional Edition</b></p> <p>Up-level your security by making the Zscaler Security Cloud your next hop to the internet. Completely secure all internet and SaaS connections for all your users—on the network or off.</p> <p>Deploy quickly without any infrastructure changes and provide instant coverage for all users.</p>	<p><b>Business Edition</b></p> <p>Further reduce complexity and enhance security with all Professional Edition features, plus advanced threat protection, SSL inspection, data protection essentials, and SIEM log streaming support.</p> <p>Phase out gateway appliances and reduce costs with a security stack as a service.</p>	<p><b>Transformation Edition</b></p> <p>Transform your network security with everything included in the Business Edition, plus a full proxy-based Cloud Firewall and Cloud IPS, always-on Cloud Sandbox with quarantine, and out-of-band CASB protection with historical scanning.</p> <p>Enable secure direct-to-internet connections from branch offices and slash MPLS backhaul costs.</p>
---	--	---

<p><b>Enterprise License Agreement</b></p> <p>This is the ideal option for larger organizations that want to embrace the full flexibility of the Zscaler platform in the most cost-effective way. All Zscaler Internet Access features are included at a cost that's lower than adding them later. As new product features are added to the ELA, they become available to ELA customers at no additional cost.</p>

Zscaler Internet Access Service	Professional	Business	Transformation	Enterprise License Agreement (ELA)
Cloud Security Platform				
<b>Data Centers</b> Global access, high availability, with latency SLAs	✓	✓	✓	✓
<b>Traffic Forwarding</b> GRE tunnel, IPsec, proxy chaining, PAC file, or Mobile Zscaler App	✓	✓	✓	✓
<b>Authentication</b> SAML, secure LDAP, Kerberos, hosted	✓	✓	✓	✓
<b>Real-Time Cloud Security Updates</b> More than 120,000 unique security updates daily and 60+ security feeds	✓	✓	✓	✓
<b>Real-Time Reporting and Logging</b> Select geography of choice for all log storage (US or EU)	✓	✓	✓	✓
<b>SSL Inspection</b> Full inline threat inspection of all SSL traffic with granular policy control	Add-on	✓	✓	✓
<b>Encrypted IPsec</b> Forward traffic via IPsec VPN tunnels	Add-on	Add-on	Add-on	✓
<b>Nanolog™ Streaming Service</b> Transmit logs from all users and locations to an on-premises SIEM in real time	Add-on	✓	✓	✓
Cloud Security Services				
Access Control				
<b>URL and Content Filtering</b> Granular policy by user, group, location, time, and quota; dynamic content classification for unknown URLs and Safe Search	✓	✓	✓	✓
<b>File Type Control</b> True file type control by user, location, and destination	✓	✓	✓	✓
<b>Web Access Control</b> Ensure outdated versions of browsers and plugins are compliant	Add-on	✓	✓	✓
<b>Bandwidth Control</b> Ensure business apps, such as Office 365, are prioritized over recreational traffic	Add-on	✓	✓	✓
<b>Standard Cloud Firewall</b> Secure SaaS and internet access with IP address, port, and protocol rules (5-tuple)	✓	✓	✓	✓
<b>Advanced Cloud Firewall and IPS</b> Secure SaaS and internet access with full outbound layer 7 cloud firewall and IPS	Add-on	Add-on	✓	✓
Cyber Threat Prevention				
<b>Inline Antivirus and Antispyware</b> Signature based antimalware and full inbound/outbound file inspection	✓	✓	✓	✓
<b>Reputation-Based Threat Protection</b> Stop known botnets, command-and-control communications, and phishing	✓	✓	✓	✓
<b>Mobile Application Reporting and Control</b> Visibility, granular policy control, and threat protection for mobile devices on or off the corporate network		✓	✓	✓
<b>Advanced Threat Protection</b> PageRisk and advanced threat web signatures for protection from malware, callbacks, cross-site scripting, cookie stealing, and anonymizers	Add-on	✓	✓	✓
<b>Standard Cloud Sandbox</b> Zero-day protection for .exe and .dll files from unknown and suspicious sites	✓	✓	✓	✓
<b>Advanced Cloud Sandbox with Quarantine</b> Zero-day protection for all file types from all sites; ability to hold file delivery until confirmed sandbox clean; advanced reporting	Add-on	Add-on	✓	✓
<b>Cloud Browser Isolation</b> Eliminate the risk of active web content and prevent data loss	Add-on	Add-on	Add-on	Add-on
Data Protection				
<b>Cloud Application Visibility</b> Discover and monitor web app access (such as streaming, social, email)	✓	✓	✓	✓
<b>Cloud Application Control</b> Gain granular control over web app access (such as streaming, social, email)		✓	✓	✓
<b>Standard Cloud Data Loss Prevention</b> Identify confidential data loss with inline scanning across PCI, PII and 2 custom dictionaries. Alerting only, no ICAP forwarding.		✓	✓	✓
<b>Advanced Cloud Data Loss Prevention</b> Identify and prevent confidential data loss with inline scanning across all dictionaries.	Add-on	Add-on	Add-on	✓
<b>DLP Exact Data Match</b> Fingerprint structured data to eliminate DLP false positives	Add-on	Add-on	Add-on	1 million cells per 100 seats
<b>ICAP Connectors</b> Send DLP detection logs from Zscaler cloud to on-premises DLP server	Add-on	Add-on	Add-on	Qty 1
<b>Essentials Out-of-Band CASB</b> Prevent data exposure and ensure SaaS app compliance for 1 sanctioned app (exclude email). No historical scanning.		✓	✓	✓
<b>Standard Out-of-Band CASB</b> Prevent data exposure and ensure SaaS app compliance for 1 sanctioned app (excluding email). Scan 1TB of historical data repositories.			✓	✓
<b>Advanced Out-of-Band CASB</b> Prevent data exposure and ensure SaaS app compliance for all apps. Scan 10TB of historical data repositories.	Add-on	Add-on	Add-on	✓
<b>Cloud Security Posture Management</b> Identifies and remediate application misconfigurations in SaaS, IaaS, and PaaS	Add-on	Add-on	Add-on	for SaaS
Additional Services				
<b>Standard Zscaler Digital Experience (ZDX)</b> Monitor and isolate user experience issues with complete end-to-end visibility for three apps	Add-on	✓	✓	✓
<b>NSS Log Recovery</b> One-hour log recovery capabilities for Nanolog Streaming Service for web and firewall logs.	Add-on	Add-on	Add-on	Qty 2
<b>SSL Private Certs</b> Use your company's private certs (instead of Zscaler certs) in for SSL inspection	Add-on	Add-on	Add-on	Qty 1
<b>Dedicated Port</b> Dedicated port enabling policy for remote users	Add-on	Add-on	Add-on	Qty 1
<b>Zscaler Authentication Bridge</b> Import and sync AD/LDAP user info to the Zscaler Cloud	Add-on	Add-on	Add-on	Qty 1
<b>Priority Categorization</b> Daily categorization of the top 100 unknown domains in your logs	Add-on	Add-on	Add-on	100 Per Day
<b>Server and IOT Protection</b> Enable full Zscaler protection for servers and IOT devices	Add-on	Add-on	Add-on	1GB monthly per 10 seats
<b>Guest Wi-Fi Protection</b> Inline protection for guest network traffic	Add-on	Add-on	Add-on	1GB monthly per 20 seats
<b>ZIA Virtual Private Service Edge</b> On-premises virtual inspection node managed by Zscaler Cloud Operations				8 virtual instances
<b>ZIA Test Tenant</b> Separate test tenant with 50 users, mirroring production tenant	Add-on	Add-on	Add-on	1
<b>ZPA Browser Access</b> Secure access to internal applications via a browser				1 ZPA seat per 100 seats
