

Zscaler™ for Office 365

Microsoft recommends direct internet connections for Office 365. Discover how Zscaler can help.

The Challenges

TechValidate, on behalf of Zscaler, conducted a survey of U.S. and European organizations that had deployed Office 365. This study confirmed that organizations continue to struggle with the best way to deploy Office 365 and, as a result, face several issues, such as network congestion, administration complexities, and upgrade costs.¹

72%

claim that deployment costs rose 25 percent or more than expected.

61%

said that upgrading gateway appliances or the cost of new branch office appliances delayed their Office 365 deployment.

62%

stated that Office 365 collaboration is suffering due to network performance problems.

Our Solution

Zscaler is the only security vendor recommended and certified by Microsoft for Office 365 deployment.

“

Zscaler simplifies and secures connectivity to Office 365 through its cloud-first security architecture.

Microsoft

Lori Crow

Director, Modern Workplace Marketing

Get the fastest, most secure connection path to Office 365

Easily scale to traffic demands with an elastic cloud architecture

Deploy quicker with a one-click setup that simplifies and automates administration

Secure and prioritize Office 365 traffic with Cloud Firewall and Bandwidth Control

2,000

Zscaler has helped more than 2,000 customers successfully deploy Office 365.

What our customers are saying

KELLY
SERVICES

Robb Wilber

Director of Global Network & Telecom

“

Direct connections minimize latency, the enemy of productivity, and Zscaler made it easy for the Kelly IT team to establish direct connections that provide fast response times and optimize the user experience.

AutoNation

Ken Athanasiou

Chief Information Security Officer

“

The timeframe we rolled out in would simply have not been possible with appliances, and there was immediate value from our deployment.

Carlsberg
Group

Jonathan Sheldrake

Director of Global Network Services

“

Thanks to Zscaler's interoperability with Office 365, I eliminated a huge headache. I no longer have to maintain ACLs, IP addresses, and new DNS addresses. Zscaler takes care of it all through its one-click feature.
