

# Zscaler Cyber Academy

## Security Operations (EDU-250)

DATASHEET

### About the Course

The Security Operations course explores Zscaler's products and solutions designed to enhance your organization's security posture through comprehensive risk management strategies. It covers foundational principles of risk management, including threat identification, assessment, and mitigation, with insights into Zscaler's Risk360.

Additionally, the course delves into advanced solutions such as Unified Vulnerability Management (UVM), External Attack Surface Management (EASM), Deception, ITDR, and Breach Predictor, detailing their capabilities, use cases, and contributions to a robust cybersecurity strategy.

We would also discuss how Zscaler Data Fabric and UVM revolutionizes vulnerability management, understand how Zscaler's AI powered product helps in enhancing an organization's security posture, cover an overview of Zscaler EASM, and finally we will focus on Deception: Architecture and Use Cases and explore how ITDR continuously monitors the Active Directory (AD) domain for any identity-based threats.

**Zscaler  
Security  
Operations**

Prerequisites	Basic knowledge of Cybersecurity domain
Learning Path	<a href="#">Security Operations (EDU-250)</a>
Certificate	A certificate is awarded upon successful completion of: <ul style="list-style-type: none"><li>• Security Operations (EDU-250) eLearning course (<b>5 hours</b>)</li><li>• Hands-on Lab (<b>4 hours</b>)</li><li>• Test (<b>30 mins</b>)</li></ul>
Resources	Visit <a href="#">Zscaler Cyber Academy</a> for more information
Delivery Formats	<b>Hybrid:</b> 5-hour elearning course + 4-hour Lab (virtual/in-person)
Target Audience	Network Engineers and Security Administrators
