

Zscaler Security Service Edge (SSE)

Zscaler's Zero Trust Exchange is a complete SSE platform that secures any web traffic, cloud resource, or private application. This unified approach reduces complexity and cost while securing all users, apps, and data.

What makes Zscaler SSE such a popular, proven solution for today's leading organizations?

| Zscaler Secure Web Gateway

Secures access to the internet and the web, with fully scalable inspection of encrypted traffic

Proven inline performance and threat protection delivered from the world's largest security cloud

“ Zscaler has proven to be an absolute game changer for our company's internet access experience and has allowed for us to further secure our users from risks.”

Senior Network Operations Engineer, Federal Agency [➔](#)

“ With Zscaler Internet Access we have been able to consolidate our outbound internet strategy to a single platform that conforms to our cloud first directive.”

IT Architect, Banking Organization [➔](#)

| Zscaler Cloud Access Security Broker

Comprehensive data protection that unifies security across all cloud data channels

Prevents data loss to the internet and gives risk visibility and control over all your cloud app data

“ The combination of security features, DLP, CASB makes this tool a great choice for the companies that have people working from home. Our goal is to have a zero trust network. This is one of the must tools if you want to achieve it.”

Director of Information Security, Financial Firm [➔](#)

“ API integration and log visibility for roaming users are excellent... Whitelisting and blacklisting of various domains, IP, policy creation are very easy.”

Security Operations Center Analyst, Construction Company [➔](#)

| Zscaler Zero Trust Network Access

Delivers zero trust remote access to private applications without the limitations and risks of traditional VPN

Eliminates the attack surface by making apps invisible to the web and giving access only to those authorized

“ Zscaler has given us the ability to move away from old school methods of connecting to the workplace. We can get rid of VPN and VDI and lean on powerful internet connections while people work from home.”

IT Engineer, IT Services Firm [➔](#)

“ The experience with ZPA has been stellar. We were able to implement globally to 10,000 users in under 3 months.”

Senior Director, Network Services, Retail Organization [➔](#)

Organizations today need comprehensive security in a single platform that eliminates the attack surface, stops compromise, prevents lateral movement, and reduces complexity and cost—all while providing maximum performance through cloud delivery at the edge.

Fortunately, this is exactly what customers get with Zscaler SSE.
