Zscaler Digital Transformation Administrator

60 questions | 90 minutes | Professional Level

Recommended Learning | Zscaler for Users - Administrator (EDU 200) Course & Lab

Passing the Zscaler Digital Transformation Administrator (ZDTA) exam is required to earn the ZDTA certification. This proctored exam is recommended for candidates with a minimum of 6 months hands-on experience with the Zscaler platform and 5 years work experience in both IT networks and cybersecurity.

To prepare for the exam, candidates are strongly encouraged to review the ZDTA Study Guide. The Zscaler for Users - Administrator (EDU 200) eLearning courses and hands-on lab are also highly recommended to achieve a passing score on the exam.

The following topics are general guidelines for the content likely included on the exam, however, other related topics may also appear on any specific exam delivery. In order to better reflect the exam content and ensure clarity, the guidelines below may change at any time without notice.

User & Device Management	**18%**
Platform Management	**18%**
Policy & Security Configuration	**29%**
Monitoring, Reporting & Analytics	**13%**
Troubleshooting & Incident Response	**13%**
Integration & Optimization	**9%**

Note: An expansive version of the blueprint, including objectives, can be viewed within the ZDTA study guide.
