SOLUTION BRIEF

Zscaler MDR

Augment your team with 24x7 expert human assistance

Attacks are accelerating and defenders are falling behind

Security teams have long struggled to keep up with alert volume, identify sophisticated attacks, and quickly contain active threats. AI is only increasing the challenges, with:

- Attack surfaces that keep expanding while SOC headcount stays flat
- Disconnected tools that require constant chair swivels between consoles
- Point solutions that produce endless low-value alerts that waste time and overwork analysts

Security teams need accelerated and advanced detection and response — honed by deep security expertise and years of threat data — that's not dependent on growing headcount.

Detect, respond, and remediate threats at scale

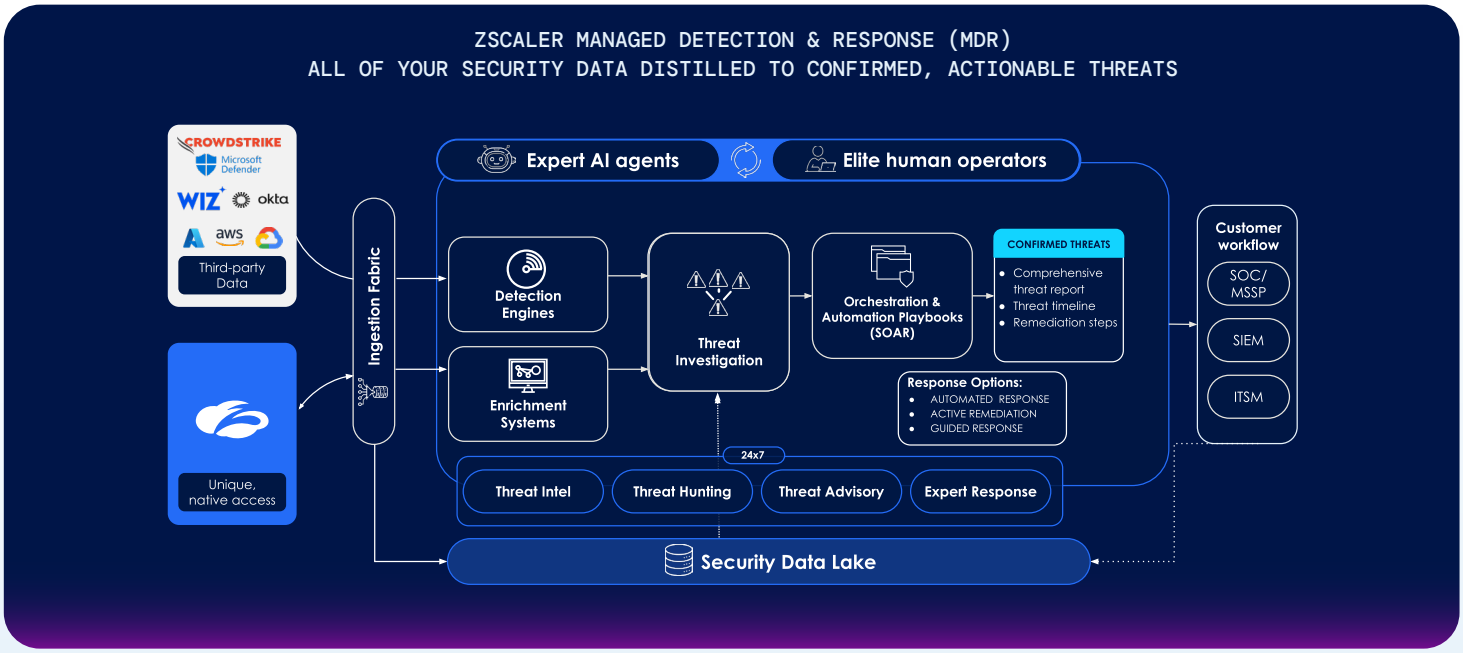

Activate world-class security for your endpoints, identities, network, and cloud infrastructure in a consolidated approach with an on-call team of security experts that has your back 24x7x365. Enjoy the benefits of:

4x increase in confirmed threats detected

99%+ noise reduction, eliminating alert fatigue

10x improvement in mean time to respond

Zscaler MDR propels you from event to resolution faster by removing noise, automating actions with easy-to-use playbooks, and expert AI agents trained on 12 years of security data. We hunt, research, manage, respond, and remediate threats at scale, allowing you to stay focused on your mission.

Get Herd Immunity from Prevalent Threats Across Your Environment

Cloud (inc. Control Plane, CNAPP)

- Comprised user credentials
- Misconfigured environments
- Runtime threats
- IAM role abuse
- Data exfiltration

User (inc. Identity, Email, SaaS)

- Account compromise
- Unauthorized access
- Business email compromise
- MFA attacks

Endpoint (inc. Network, OT)

- Credential theft
- Malware
- Ransomware
- Unmanaged devices (IoT)

ACTIONABLE THREAT INTELLIGENCE

- Gain proactive, tactical insights into emerging global threats
- Collaborate with our analysts to understand your threat profile and the threat landscape
- Get herd immunity and protection from threats discovered across 1000s of customer environments

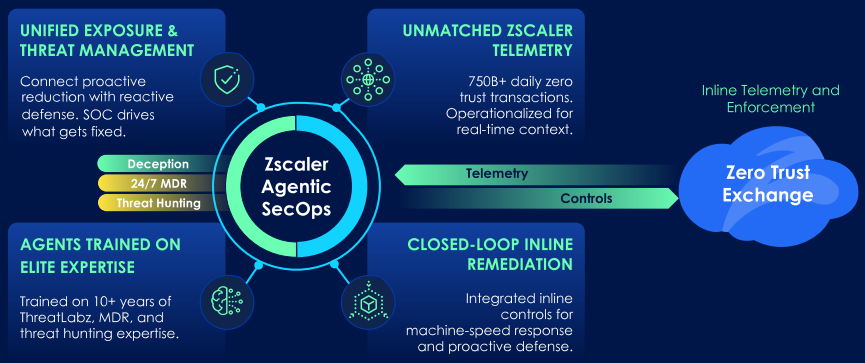

EXPERT RESPONSE

- **Automated:** Playbooks allow you to quickly notify the right people, contain threats, and begin remediation automatically
- **Guided:** Our real-time guidance during incidents includes clear write-ups on threats, with mapping to MITRE ATT&CK® TTPs
- **Active:** Get human-led, hands-on-keyboard response as an extension of your SOC, ensuring threats get mitigated even when your team is unavailable

UNMATCHED THREAT DETECTION

- Get protection from threats that might otherwise be missed with our sophisticated detection engineering and 7500+ custom analytics
- Benefit from 12+ years of real-world security operations best practices and standard operating procedures
- Get peace of mind with a service that catches 4x more confirmed threats than security tools can find on their own
