

Shape the future
with confidence

Sector and industries

- All

Functions

- Cybersecurity, technology

Service offerings

- Strategy and advisory:**
 - Strategy baseline or creation
 - Business case development
 - Architecture workshops
 - Zscaler health check
- Transformation:**
 - Solution design and architecture
 - Zscaler operating model
 - Zscaler stack implementation
- Operate:**
 - Zscaler system support

Why are enterprises investing in a “zero-trust” strategy?

As enterprises seek to reduce cybersecurity costs and protect business operations from increasingly sophisticated threats, holistic security solutions are needed that reduce risk and the “friction” introduced by legacy security solutions. With the proliferation of hybrid work and the rise of opportunistic insider threats, traditional perimeter security (i.e., castle and moat) is no longer sufficient to mitigate cybersecurity risk. Zero-trust is the scalable and modern approach to address modern threats and empower business teams.

What are the common challenges while unlocking the value of zero-trust?

- Defining an enterprise zero-trust strategy.
- Obtaining visibility into data and application landscape.
- Configuring zero-trust tools to meet compliance objectives.
- Collaborating across teams and addressing skill gaps.
- Managing and continuously improving tools and processes.
- Overseeing change management and performance monitoring.

EY services and differentiators

- EY-Zscaler alliance
- Multiple service offerings:
 - Strategy and advisory
 - Transformation
 - Operate
- Real-world implementation experience with global clients
- A library of accelerators

EY accelerators

- Zscaler health check framework
- Solution architectures
- Zscaler cost take out
- Deployment documentation
- Merger and acquisition support
- SAP RISE
- Operating model
- Operation runbooks

Referenceable case study

- Client challenge:** Global biopharmaceutical company that develops innovative medicines, vaccines and animal health products needed to adopt zero-trust approach across the enterprise.
- Our solution:** Deployed Zscaler solutions across enterprise environments (e.g., remote, on-premises, endpoints and applications).
- Value delivered:** Achieved uniform security posture across the enterprise, enhanced 150+ critical applications by enforcing zero-trust, and reduced integration time and complexity during M&A from weeks to months.

EY-Zscaler alliance overview

With more businesses moving toward digital transformation, there is heavy emphasis on reducing complexity, improving speed and converging network connectivity with security functions. The formation of the EY-Zscaler alliance helps address clients’ network architecture challenges through cloud-delivered services that highlight simplicity, security and an enhanced user experience on all fronts.
