zscaler™

Retail – Cloud Assurance

Zscaler™ CSPM

Continuous Cloud Security and Compliance Assurance for Microsoft Azure, Amazon Web Services, and Office 365

Company

A Gartner-recognized leader in cloud security, the Zscaler Zero Trust Exchange includes cloud security posture management (CSPM) services that identify and eliminate cloud risks.

Product

Retail organizations adopting public cloud technologies, handling personally identifiable information (PII), payment card information and customer's personalization data, will now be able to **prevent more than 80 percent of security breaches** and **enforce compliance** with security frameworks, applicable regulations and data protection laws using Zscaler CSPM.

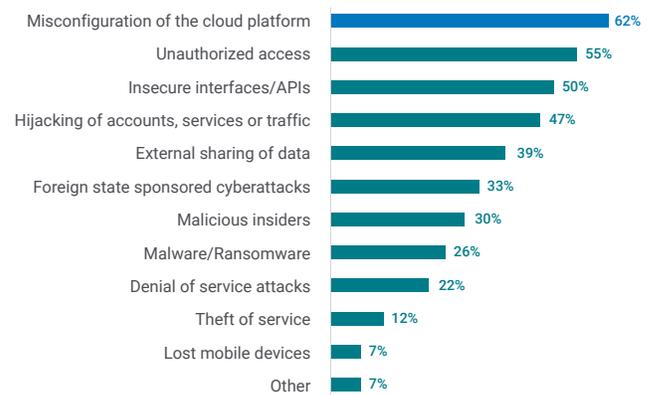

Customers

Enterprises, managed service providers (MSPs) and independent software vendors (ISVs) in the retail industry that store and process PII, payment card information, and customer's personalization data, especially those interested in understanding and implementing cloud security controls.

Misconfigured cloud impedes digital transformation

Organizations are challenged to (a) prevent security breaches and (b) prove security for public cloud workloads.

Misconfiguration of the cloud platform	62%
Unauthorized access	55%
Insecure interfaces/APIs	50%
Hijacking of accounts, services or traffic	47%
External sharing of data	39%
Foreign state sponsored cyberattacks	33%
Malicious insiders	30%
Malware/Ransomware	26%
Denial of service attacks	22%
Theft of service	12%
Lost mobile devices	7%
Other	7%

Gartner recommendation

❝ Through 2024, organizations implementing a cloud security posture management (CSPM) offering and extending this into development will **reduce cloud-related security incidents due to misconfiguration by 80%.**❞

Gartner

Offer overview

Product capabilities

Various product capabilities enable proactive management of cloud risks

Single Sign-On			
Visibility	**Governance**	**Administration**	**Integrations**
Security Posture	Cloud Security Policies	Users and Roles	Data Feeds
Compliance Posture	Compliance Frameworks	Cloud Accounts	Co-Branding
OS Security Policies	Remediations (Auto, Guided)	Scan Frequency	Ticketing
Risk Posture Prioritization	Policy Exceptions	Notifications	CI / CD
🔒 **Cloud Connectors** (Control Plane APIs)			
Azure	Office 365	AWS	Google (roadmap)

Items marked with 🔒 have limited capabilities as described below.
Eligible customers can request limits be removed/relaxed for the evaluation period. Offer is subject to change.

License quotas and restrictions

Below SKUs indicate the number of cloud accounts pre-allocated per license

- **Healthcare_1**   Includes a total quota of any one (1) cloud account across any cloud connectors.
- **Healthcare_5**   Includes a total quota of any five (5) cloud account across any cloud connectors.
- **Healthcare_10**   Includes a total quota of any ten (10) cloud account across any cloud connectors.

For all SKUs, there's a soft restriction on the number of resources within a cloud account.
Restriction: Azure and AWS - Up to 500 total resources; **Office 365:** Up to 1,000 users.

Compliance bundles included
