Delivering Zero Trust for Users, Applications, and Workloads on AWS

Zscaler provides the zero trust architecture and purpose-built solutions you need to secure your AWS deployments. These three core services provide seamless user experiences with Zero Trust security:

Zscaler Private Access (ZPA)

Zscaler Internet Access (ZIA)

Zscaler Digital Experience Monitoring (ZDX)

Together, Zscaler and AWS help organizations gain a competitive edge by hardening their security posture while increasing business agility.

Zscaler by the Numbers

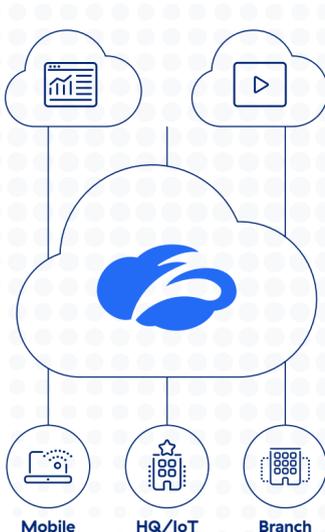

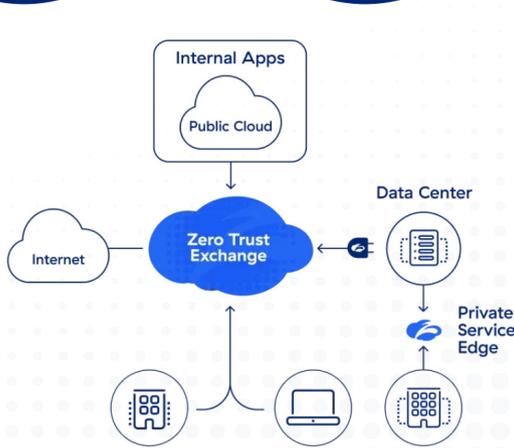

Each day, Zscaler blocks **7B+** threats

Processes **300B+** daily transactions

Provides **250K+** unique security updates daily

Zscaler Private Access (ZPA)

Zscaler Private Access (ZPA) provides fast, secure, and seamless access to private applications while minimizing the attack surface and lateral threat movement. As a cloud native service, ZPA can be deployed in hours to replace traditional remote access tools, such as VPN and VDI.

Zscaler Internet Access (ZIA)

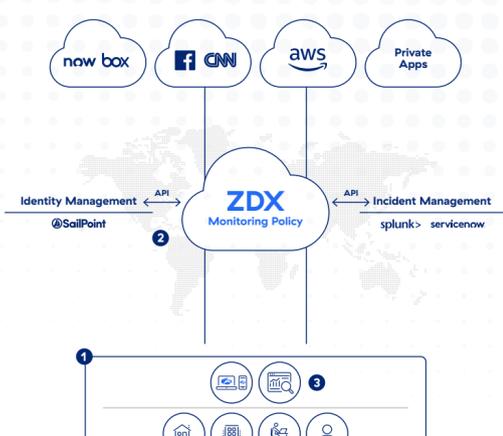

Zscaler Internet Access (ZIA) provides safe, fast Internet and SaaS access and includes a comprehensive suite of AI-powered security and data protection services to help you stop cyber attacks and data loss.

Zscaler Digital Experience Monitoring (ZDX)

Zscaler Digital Experience (ZDX) helps IT teams monitor digital experiences from the end user perspective to optimize performance and rapidly fix offending application, network, and device issues.

How it works...

- 1 Client Connector with ZDX enabled
- 2 Monitoring Policy configured and applied
- 3 Always-on metrics sent and correlated

Case Studies

Deploying ZPA

Zscaler for

CHALLENGE

GROWMARK's employees in more than 500 rural locations struggle with slow, unreliable VPNs.

SOLUTION

GROWMARK achieved fast connections, the removal of public interfaces, reduced attack surface, and secure remote access to internal applications on AWS.

Deploying ZIA

Zscaler for

CHALLENGE

MAN Energy Solutions' globally distributed teams required mobile access to apps and custom business tools.

SOLUTION

MAN adopted ZIA to safely connect mobile workers to MAN's SaaS applications from any location with fast and reliable performance.

Deploying ZDX

Zscaler for

CHALLENGE

Liberty Mutual Insurance sought a forward-thinking user experience working from home.

SOLUTION

Liberty Mutual's security team more easily resolved home network user issues with ZDX, which has been integrated across the whole organization.

“For a workforce that’s nearly 100% remote, ZPA offers a seamless experience, provides vastly improved protection, and reduces the support burden.”

Anthony Cunha
CISO, Mercury Financial
