INDEPENDENT PRACTITIONER’S REPORT
INDEPENDENT PRACTITIONER’S REPORT

To Zscaler:

Scope

We have examined management of Zscaler’s (“Zscaler”) assertion that description of its personnel screening and access authorization procedures (“the “Controls”) related to aspects of the International Traffic in Arms Regulations (“ITAR”) for its Zscaler Private Access (ZPA) and Zscaler Internet Access (ZIA) Government Cloud (“GovCloud”) platforms, as of December 13, 2019 (the “description”) is fairly presented, and the Controls stated in the description, were in place as of December 13, 2019, in accordance with management’s assertion. Zscaler provides segmented infrastructure for performing services to US government organizations. The dedicated government deployments of ZPA and ZIA are referred to as GovCloud throughout the report and the associated testing memo. Zscaler management is responsible for its assertion. Our responsibility is to express an opinion on management’s assertion based on our examination.

Zscaler uses a combination of Amazon Web Services, Inc. (“AWS”) and colocation facilities for providing its services. The description in Section 3 includes only the Controls performed by Zscaler and excludes the controls, and procedures of to those organizations. Our examination did not include the services provided by these organizations, and we have not evaluated the suitability of the design or operating effectiveness of such complementary subservice organization controls.

Zscaler Responsibilities

Zscaler has provided the attached assertion, in Section 2, about the fairness of the presentation of the description based on the description criteria. Zscaler is responsible for preparing the description and the assertion, including the completeness, accuracy, and method of presentation of the description and assertion; providing the services and related controls covered by the description; determining the applicability of implementing the controls described therein for conformance of its personnel screening and access authorization procedures to meet the applicable requirements of ITAR.

Independent Practitioner’s Responsibilities

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards required that we plan and perform the examination to obtain reasonable assurance about whether management’s assertion is fairly stated, in all material respects. An examination involves performing procedures to obtain evidence about management’s assertion. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of management’s assertion, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

Inherent Limitations

Our organization is a licensed and independent CPA firm; however, our examination does not constitute a legal determination of compliance with the relevant regulations or a substitute for audit procedures that may be applied separately by regulatory entities. The specific procedures we performed, the nature, timing, and results of our tests are presented in section 4 of our report titled “Results.”

Because of their nature, Zscaler controls may not prevent, or detect and correct, all errors or omissions relevant to the its personnel screening and access authorization procedures. Also, the projection to the future of any evaluation of the fairness of the presentation of the description, or conclusions about the suitability of the design of the Controls is subject to the risk that controls at Zscaler may become inadequate or fail.

Opinion

In our opinion, management’s assertion in all material respects, based on the criteria described in Zscaler’s assertion in Section 2, is fairly stated, in all material respects.
a. The description fairly presents the Controls in place as of December 13, 2019, as required by the applicable requirements of ITAR; and

b. The Controls, stated in the description, were in place as of December 13, 2019.

**Restricted Use**

This report, including the description of the tests of controls and results thereof in the Testing Matrices, is intended solely for the information and use of Zscaler, and users of its ZPA and ZIA GovCloud services as of December 13, 2019, who have sufficient knowledge and understanding of the following:

- The nature of the service provided by Zscaler;
- How Zscaler’s system interacts with users;
- Internal control and its limitations;
- The applicable ITAR requirements and users’ responsibilities for compliance; and
- The risks that may threaten the achievement of the applicable ITAR requirements and how controls address those risks.

This report is not intended to be and should not be used by anyone other than these specified parties.

Tampa, Florida
December 13, 2019
SECTION 2

MANAGEMENT’S ASSERTION
MANAGEMENT’S ASSERTION

We have prepared the description of Zscaler’s ("Zscaler") personnel screening and access authorization procedures (the “Controls”) related to aspects of the International Traffic in Arms Regulations ("ITAR") supporting the ZPA and ZIA GovCloud platforms (the "description") for user entities of the system as of December 13, 2019. We confirm, to the best of our knowledge and belief, that

a. the description fairly presents the Controls supporting the ZPA and ZIA GovCloud platform as of December 13, 2019. The criteria we used in making this assertion were that the description
   i. presents how the Controls were designed and implemented;
   ii. describes the controls deemed applicable by management for complying with aspects of ITAR;
   iii. specifies the assertions and Controls designed to achieve those assertions, and
   iv. does not omit or distort information relevant to the scope of the Controls supporting the ZPA and ZIA GovCloud platforms.

b. the controls related to Zscaler adherence to ITAR requirements were suitably designed as of December 13, 2019, to achieve the related assertions. The criteria we used in making this assertion were that
   i. the risks that threaten the achievement of the assertions stated in the description have been identified by Zscaler; and
   ii. the controls identified in the description would, if operating as described, provide reasonable assurance that those risks would not prevent the assertions stated in the description from being achieved.

Section 3 of this report includes Zscaler’s description of the Controls supporting the ZPA and ZIA GovCloud platforms related to the applicable requirements under ITAR that is covered by this assertion.
