Overview

Zscaler Experience Center is your centralized command console for managing all Zscaler solutions. Unifying Zscaler Internet Access™ (ZIA), Zscaler Private Access™ (ZPA), Zscaler Digital Experience™ (ZDX), Zero Trust Branch, Workload Segmentation, and IoT/OT Security into one intuitive platform, it simplifies operations, accelerates zero trust adoption, and delivers actionable insights for more effective decision-making. Experience Center is the singular unified console to manage the entirety of Zscaler products and services.

Key benefits

1. Unified platform

Manage all Zscaler offerings in one console:

- Internet access (ZIA)
- Private application access (ZPA)
- Digital experience monitoring (ZDX)
- Users and entitlements (authentication service)
- Workload segmentation (Cloud Connector)
- Zero Trust Branch (Branch Connector, Device Segmentation)
- Remote users (Client Connector)
- IoT/OT Device Segmentation

Eliminate the need for multiple dashboards and streamline operations with a single-pane view.

2. Simplified zero trust adoption

Guided workflows and point-and-click interfaces make it easy to:

- Onboard users
- Configure security policies
- Deploy zero trust across users, devices, workloads, and locations

3. Comprehensive insights

Real-time analytics provide visibility into:

- Network performance and traffic patterns
- Traffic flow and connectivity health across connectors
- User experience, application performance, and service availability
- Threat trends and traffic inspection

4. AI-powered assistance

Leverage our generative AI copilot to accelerate troubleshooting, find instant answers, and get suggested next steps to simplify IT operations.

5. End-to-end zero trust segmentation

Dynamically segment users, devices, workloads, and locations to prevent lateral threat movement and strengthen your security posture.

Why Zscaler Experience Center?

- True unification: Manage security, access, and experience for your entire organization in one place.
- Operational efficiency: Save time and reduce complexity with AI-driven workflows and centralized policies.
- Stronger security: Enforce zero trust principles everywhere without relying on VPNs, SD-WANs, or VLANs.
- Scalable architecture: Protect users, devices, workloads, and IoT/OT systems globally.

Ready to simplify security management?

Experience the power of Zscaler's unified platform.
